Bosnian (*native*)  
English  
Albanian

## PROFILE

Software Engineering graduate with hands-on experience in web development using HTML, CSS, JavaScript, and React. Passionate about UI/UX design and usability testing, with a strong foundation in front-end technologies and problem-solving.

## EXPERIENCE

### Amazon Clone

- Responsive layout created using: HTML and CSS
- Product Display: The application displays a variety of products with details like price, ratings and ability of choosing quantity, size or color (depending on the product type).
- Shopping Cart: Users can add products to their cart, update quantities, and remove items.
- Checkout Process: The app integrates a simple payment process, where users can review their cart and complete the purchase.
- Track Orders: User can track his orders.

### Makeup Web Shop

- Responsive layout created using: HTML and CSS
- React's component-based architecture
- React Router used to implement client-side routing, enabling fluid navigation and dynamic page rendering
- External APIs used to fetch and display list of products
- Local storage functionality used to simulate a shopping cart feature, allowing users to add items to their cart and persist their selections across sessions.

### Customizable Gift Shop

- Responsive layout created using: HTML, CSS and Bootstrap
- Interface is accessible and visually appealing across all devices, fulfilling WCAG compliance standards
- Authentication and user privileges were allocated through session management protocols
- JavaScript/jQuery used to implement client-side functionalities enabling users to customize product attributes such as color and size
- MySQL database used to efficiently manage customer orders

## EDUCATION

### Bachelor of Science

#### University Ukshin Hoti

2018-2021

Faculty of Computer Science  
Department: Information Technologies and Telecommunication  
Title: Bachelor of Science in Information Technologies and Telecommunication

### Master of Science

#### South East European University

2021-2023

Faculty of Contemporary Sciences and Technologies  
Programme: Computer Science  
Module: Software Engineering  
Title: Master of Science in Software Engineering
