P R O F I L E

A results-oriented and adaptable person with a master's degree in software engineering, complemented by a keen eye for detail and a passion for problem-solving.
Possessing a knack for effectively communicating complex ideas to diverse audiences, I thrive in collaborative environments where creativity and innovation are encouraged.
Highly motivated and passionate to learn and improve programming skills.

E X P E R I E N C E

Makeup Web Shop

- Responsive layout created using: HTML and CSS
- React's component-based architecture
- React Router used to implement client-side routing, enabling fluid navigation and dynamic page rendering
- External APIs used to fetch and display list of products
- Local storage functionality used to simulate a shopping cart feature, allowing users to add items to their cart and persist their selections across sessions.

Costomizable Gift Shop

- Responsive layout created using: HTML, CSS and Bootstrap
- Interface is accessible and visually appealing across all devices, fulfilling WCAG compliance standards
- Authentication and user privileges were allocated through session management protocols
- JavaScript/jQuery used to implement client-side functionalities enabling users to customize product attributes such as color and size
- MySQL database used to efficiently manage customer orders
